Subject: Microsoft Settlement

I am terribly disappointed by the Microsoft proposed settlement. I believe that it is very clear that Microsoft engaged in monopolistic and predatory behavior. It's punishment should be nothing less than being split up. Look at what the split up of AT&T did for the telecom industry! Unfettered by its monopolistic practices that industry flourished throughout the next two decades. The same could happen to the computing industry should the DOJ have the courage to act appropriately.

Thank you for your time in this matter,
